

SURF

widespan acoustically transparent fabric for ceilings and walls

description

seamless 10'-10" feet wide up to 240 feet long

best choice in raking light conditions

better bulk, no wrinkling along track edge

lower price

more opacity

smoother surface, more monolithic

reversible for choice of textures

soil-release finish on both sides

lower custom color minimums

better color consistency

clearer print quality

made in USA

preferred by architects and installers of
Novawall, Fabritrak, Whisperwalls, Eurospan, Stretchwall etc.
